### PERSONAL PROFILE

I'm an enthusiastic frontend developer who pays close attention to detail and is eager to learn and use new technologies. I have over 2 year's commercial experience working as a frontend developer in an insurance based environment creating interactive and responsive websites.

Exceptional computer skills, enthusiastic about web development and technology having completed an Open University BSc (Honours) Degree in Computing & IT.

Highly self-motivated and keen learner having completed numerous home learning courses.

Hardworking and flexible individual able to work as part of a team or alone under my own initiative.

Experienced in working to meet strict deadlines, working under pressure, achieving predefined targets and giving feedback on how technical requirements should be implemented.

Excellent verbal and written communication skills having worked in customer facing environments for over 10 years.

---

### CAREER SUMMARY

#### June 2018 – Current

#### Frontend Developer – The Hood Group, Southend-On-Sea

Working on the frontend of existing and new websites, building interactive UI's and connecting into API's. I also took on some backend work where I was maintaining C# .Net services and ASP.Net websites.

##### Key Achievements:

- Updating and maintaining in house built .Net services and quote websites.
- Using frontend skills such as; JavaScript, JQuery, JQueryUI, HTML5, CSS, SASS & AJAX.
- Using backend skills such as; .Net, ASP.NET, C#, Entity framework, MYSQL and Umbraco.
- Successfully meeting strict project deadlines while providing input on best practices.
- Guiding and teaching junior developers with code reviews and training.

#### September 2016 – May 2018 Junior Frontend Developer – The Hood Group, Southend-On-Sea

Gaining commercial experience building the frontend of home insurance applications for large insurance companies. Working closely with the development team in an agile environment, building and maintaining new and existing websites.

##### Key Achievements:

- Some of the websites I have worked with include the Asda and West Brom home insurance websites.
- Using skills such as HTML5, CSS3, Bootstrap 3, JavaScript, JQuery and XML daily.
- Building a home insurance website from start to release and then maintenance, while also being involved in the requirements gathering process and having my ideas put forward to be used on the website.

#### July 2016 – September 2016

#### Freelance Web Developer

Gaining real world experience gathering requirements from clients and turning these requirements into designs. Using both front and backend technologies. This time was also spent finishing my degree and creating personal websites to improve my own skillset.

In charge of the stockroom, delivery, maintenance and health & safety. Daily, I would delegate jobs to staff members to ensure work is completed on time. Some of my other jobs would include end-of-day cashing up and any admin duties required.
